

M E T A G O L D

The Ultimate Virtual Reality Hyper-Realistic Metaverse

The MetaGold

Our imagination is much larger than the world we live in. But the world we live in is limited by our human body, the laws of nature, physics, and time. Welcome to MetaGold, the World's first realistic Metaverse in VR built on the Blockchain, welcome to a world without limitations.

Free for everyone to visit and explore, MetaGoldverse will replace our current experiences of TV, cinema, business communications, education, entertainment, shopping, commerce services, even search and much more.

As we continue to develop commercial partnerships providing education, leisure and commerce services we will be creating a new digital economy and breed of entrepreneurs working, creating and trading goods and services exclusively within Meta Gold verse.

Our Vision for MetaGold is to create a virtual world that is both engaging and practical. Providing real solutions to many of the challenges we face both individually and collectively as an interconnected global society. A place where people come to work, rest, shop, play and learn.

We will create and nurture a self-sustaining economy of both established and new innovative businesses, with the world future-proofed, and continuing to evolve over time without dependence on its original creators.

What is MetaGold?

MetaGold is the first Blockchain-based MMORPG in Virtual Reality with Realistic Graphics built on Unreal Engine, created and owned by its users. It is a universal platform that will connect games, decentralized applications, and virtual realities – a Metaverse.

Our revolutionary development, the combination of the latest generation of emerging technologies, a highly skilled, experienced, and competent team together with strong, market-leading strategic partners, means we are now able to offer users an experience unlike anything ever seen before.

We have designed MetaGold from the ground up with our citizens empowered to build and develop the future of the world themselves, with the world evolving and living without its original creators.

Built on the blockchain all assets whether received in the game or directly created by the users are registered on the blockchain as NFT's. Citizens will be able to build, create and securely trade both in and out of world NFT's securely within The Big MetaGold Marketplace.

MetaGold has been developed to be future-proofed with a fully upgradeable engine and technologies. Built as a Decentralized Autonomous Organization (DAO), MetaGold will be fully owned by its citizens and the community, who are empowered to determine the future of the world and create the laws.

We will be creating a Never-Ending Motivating Economy where all creators and active citizens are regularly and fairly rewarded for their work, voting, reviews, completing Quests, staking MGV Tokens, and also random airdrops within the world.

Existing businesses and brands will want to establish their presence in MetaGold (\$MGV), to connect with our citizens and support them by providing goods and services, both for digital delivery and in real life. A new generation of innovative entrepreneurs will be created, as traditional barriers to entry are removed and new opportunities identified.

Citizens and Businesses will be able to own their own digital real estate in MetaGold Verse, buying their own MetaGold Lands by auction, These lands can then be mined for resources and be able to build anything they can imagine.

Competitive market forces and financial rewards will motivate the community to create the most appealing, entertaining, or desirable content, games, applications, or lectures for the community as quickly as possible.

- ✓ People owning digital land registered on the blockchain will be able to either use, rent or resell.
- ✓ Businesses will locate new retail stores and showrooms offering lower costs 24/7 availability and perfect scalability.
- ✓ Artists and Creators will be able to showcase their NFT's in the gallery and sell them in The MetaGold Marketplace.
- ✓ Schools, colleges, and universities will be transitioning their learning over to virtual reality in the coming years.
- ✓ A world of exploration and adventure with reward-based systems, games, quests and never-ending adventures.
- ✓ A new form of advertising will be created in MetaGold Verse, which will be more entertaining, engaging, targeted and with higher conversions.

-  Artificial intelligence and machine learning will eventually be deployed into the world, offering additional benefits to users and businesses.

THE MARKET

Market Map of the Metaverse

It is unquestionable that Virtual Reality will change our world. With timing critical, we've been waiting for the right moment when technology and adoption will allow us to be the best on the market.

Thanks to the combination of several newly created technologies, what we can send into virtual glasses has not been possible in virtual reality in multiplayer so far.

Bringing together a winning combination of best in class technology solutions including Oculus, Unreal Engine, Blender, Reality Capture, Motion Capture, Face Capture and our own proprietary technology, that will both define trends and set firm foundations for our future evolution as we create a world without equal.

Our analysis and research into the marketplace and our competitors has provided us with significant insight into the challenges they faced and the

various mistakes they have made, whether through bad timing or inappropriate choices of technology that will restrict their future development and upgradability.

Unlike some of our competitors, MetaGold is a World built for the future. We have specifically designed to be fully upgradeable, with our graphics and world capabilities continuing to improve in-line with the latest innovations and trends in the virtual reality, blockchain and gaming sector.

We will never stand still the world will continue to evolve into the future.

Virtual Reality offers a revolutionary way of passing on information, advertising, presenting projects, communicating with people and gaming. We have already arranged a large number of influential partners who already want to open their branch with us – for example in the form of a virtual salon, showroom or portal to an external application, etc.

The most important thing is for us to bring users to the platform and give them reasons to stay, explore and keep coming back.

Imagine you want to open a retail store. How would you decide on your location? Will you open it in the middle of a populous city with a high footfall of passing traffic, or in the desert? Of course, in the city! Why? Because there are no people in the desert. This is the problem the other virtual worlds are currently unable to overcome. Their worlds are not engaging for the users and they have no reason to keep returning.

If you want to present yourself in those other virtual worlds, it is about as interesting as building your store in the middle of the desert.

That's why we have designed the entire world of MetaGold to entertain and reward users for completing quests, exploring and discovering. There will be new opportunities every day encouraging users to return and

engage with the world. We will host competitions and give daily/weekly/monthly rewards for users, and working with the top tier of the gaming industry, we will be creating a series of Quests and Mini-games drawing on the rich experience gained from our predecessors.

The entire world of MetaGold is designed specifically for Virtual Reality, and the entire world is available in REALISTIC GRAPHICS.

We will be targeting a wider demographic of users than our competitors. Our development technologies and scalable servers mean we are the first VR world to host millions of users online at one time. We will connect a rapidly growing community of crypto enthusiasts with an already very large community of players (2.69 billion currently).

Our primary focus will be targeting users of cryptocurrencies and speculators as early adopters. These users already have a good understanding of blockchain technologies, and will be able to easily understand our vision for the world, and be an early adopter, purchasing \$MGV Tokens as they believe in the potential of the project and see it as a good investment.

Our secondary target will be the giant global gaming community who will want to become a pioneer of this new world.

We will become one of the main global marketplaces for NFT's (non-fungible tokens). Within MetaGold virtual reality metaverse, users will be able to create NFT's Tokens (Art, 3D objects, customization of other objects) and securely trade both their in and out world NFT's in The MetaGold Big Marketplace.

TOTAL ADDRESSABLE MARKET (TAM)

With a projected CAGR of 9.17% between 2020 and 2025, Mordor Intelligence expects the global video games market to exceed \$256 billion by 2025, with projected revenue of \$1,274.4 billion in 2030.

Value of the Global Games Market 2012 to 2030

2012	2015	2021	2025	2030
\$52.8 Billion	\$81.5 Billion	\$138.4 Billion	\$256.97 Billion	\$1274.4 Billion

The Virtual Reality (VR) TAM is expected to grow from \$17.25 billion in 2021 and reach \$184.66 billion by 2026 with a CAGR of 48.7% over the forecast period 2021-2026.

The recent global pandemic has expedited the growth of both the gaming and VR market. The ongoing lockdown measures with many traditional entertainment venues inaccessible, with 'door-closed' policies at cinemas and theatres, home entertainment has been the only option for gamers, with recent surveys indicating that video gamers in the United States spent over 45% more time playing video games during quarantine than prior.

Globe Newswire predicts the global augmented reality (AR) and virtual reality (VR) market to grow by over 500% in 2021, with the global market projected to grow from \$12 billion in 2020 to \$72.8 billion in 2021.

Value Of Augmented (AR) & Virtual Reality (VR) Global Market 2020–2021

2020	2026
\$52.8 Billion	\$81.5 Billion

MetaGold will offer an Unrivaled realistic virtual reality environment that will extend beyond attracting current gamers and VR enthusiasts, but extend to entrepreneurs realtors, businesses, concert agencies, event organizers, health care, advertising and promotion agencies, artists, coaches, educators and educational institutions, the opportunity for demand is endless.

BOOMING MARKET OF NFT'S AND DIGITAL ART

MetaGold utilizes MGV Big Marketplace – NFT's Paradise, a decentralized marketplace with NFT's, operating on a smart contract.

NFT Global Market Capitalization

2017	2018	2019	2020	2021
\$30,975,025	\$180,219,479 +482%	\$210,558,198 +17%	\$315,712,346 +50%	\$710,890,777 +125%

Why are NFT's so important?

As the world becomes more and more digital, many objects emerge as digital only, and the solution to the ownership question is NFT's (non-fungible tokens). Currently, the NFT's market is getting close to a

major milestone – \$100 million NFT's sold which can be checked at NonFungible.com.

According to a recent year-end report by NonFungible.com, the leading data provider for the NFT's industry, the total market capitalization of all NFT's stood at about \$210 million in 2019. By 2021, it is predicted that the NFT's market will reach \$710 million. Bitcoin started in 2009 and reached a trillion-dollar market in February 2021. NFT's are set to reach a trillion-dollar market much, much faster.

METAGOLD TOKEN (MGV)

The MetaGold Token (\$MGV) will be the currency of MetaGold Verse. The \$MGV Tokens are pre-mined, with the total amount predetermined.

These Tokens will be our primary source of generating revenue during the start of the project.

We want MetaGold to be accessible to all, and so citizens will be able to earn MetaGold by simply taking part in the world. It will be “pay-to-speed” not “pay-to-win”.

THE TOKENOMICS

\$MGV tokens become the investment tool to purchase virtual land in MetaGold Verse. The main deflationary mechanisms of MetaGold include a 4% fee on all token sales.

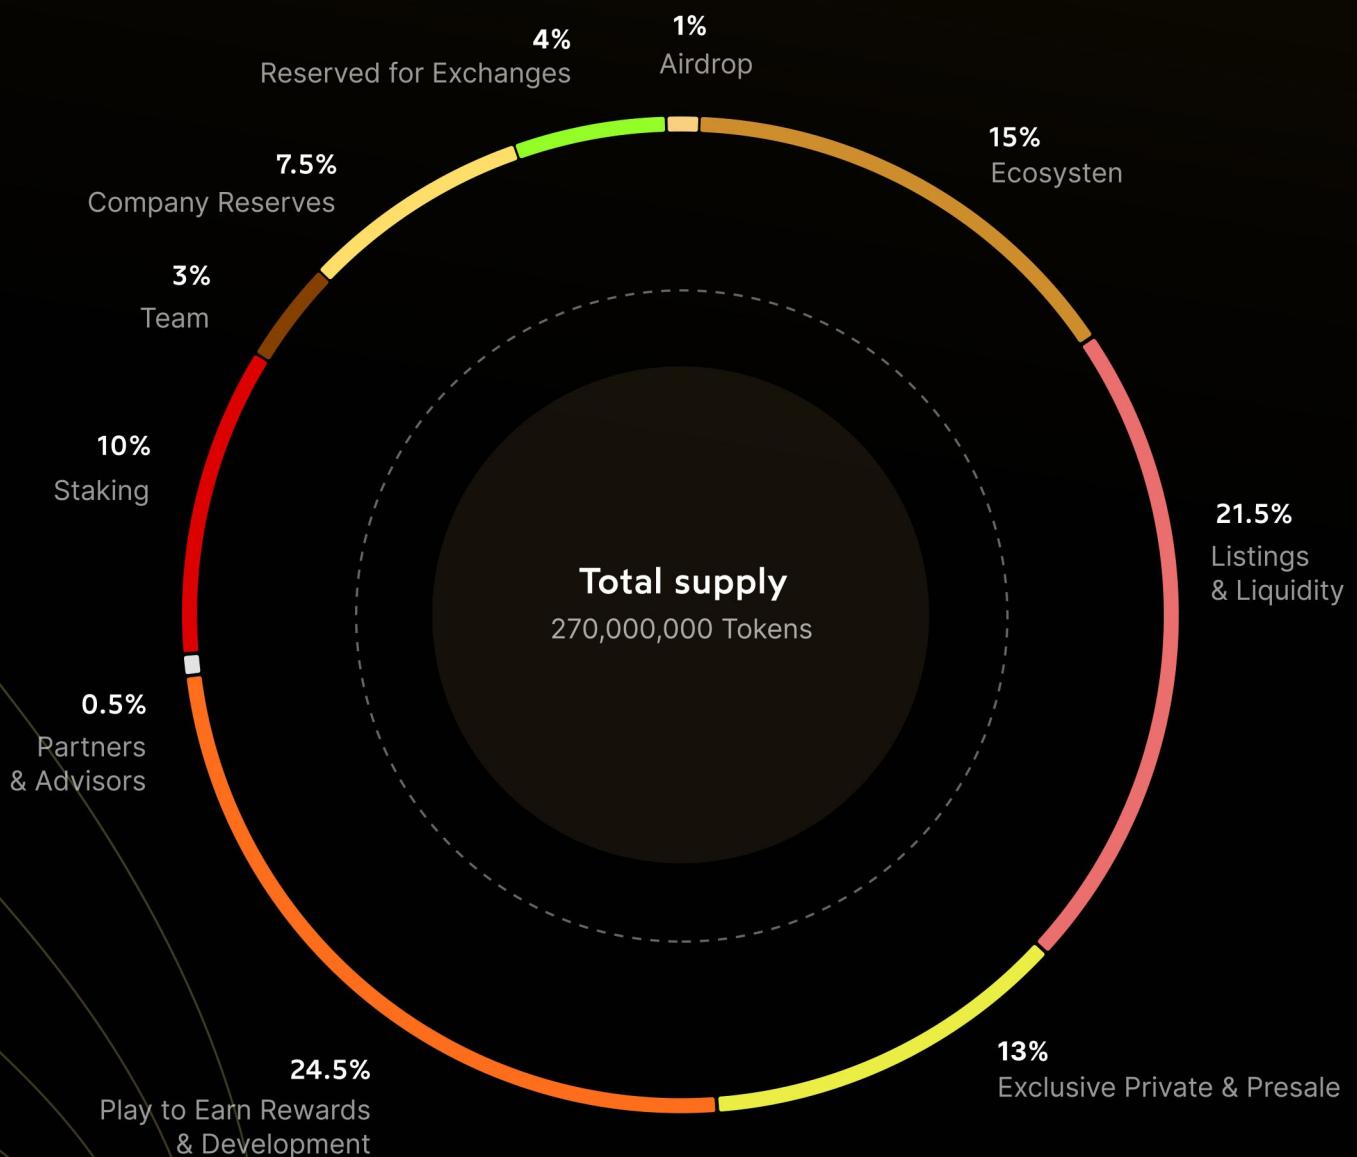

MetaGold's financial infrastructure will allow for everyone who will be settling Metaverse with us the ability to buy and sell around all things related and needed for settlement. Exploration of new frontiers involves many factors for success – in MetaGold you will find all the keys to survival.

Public Price	Max Supply	Circulating Supply	Supply at Listing	Initial Mcap
\$0.09	270 Million	243 Million	3.6 Million	\$324,000

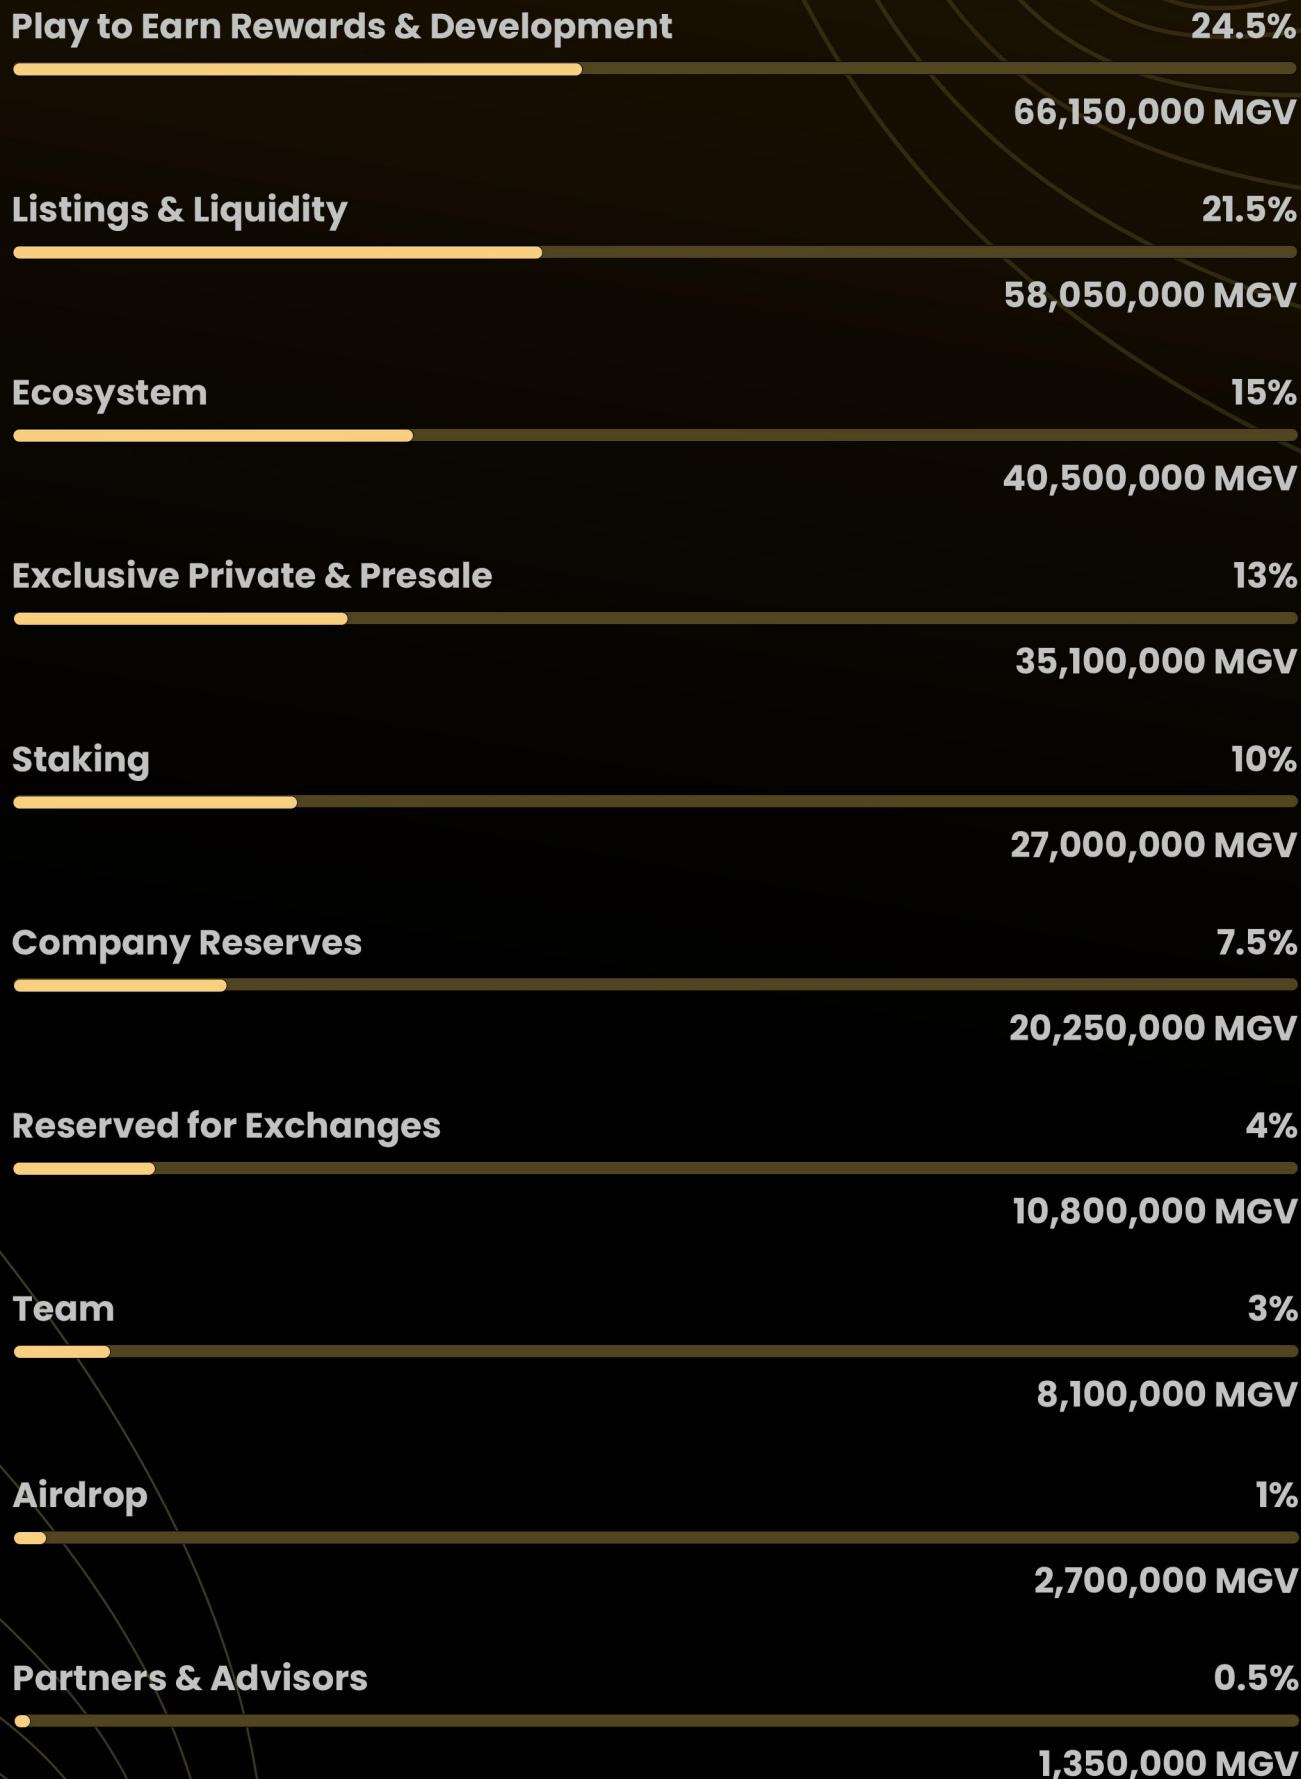

The financial infrastructure

Investors will be able to buy and sell \$MGV via both Decentralized and Centralized exchanges. All \$MGV from initial real estate purchases will be publicly burnt decreasing the overall supply of the token. \$MGV will also be required to purchase items from within MetaGold Marketplace for example; upgrading real estate space or purchasing items from within the marketplace. This is what makes \$MGV valuable and necessary for the ecosystem to operate.

Token Distribution

Token Distribution

MGV EXPOSITION SYSTEM

Name	Symbol	Decimals
MetaGold	MGV	18
Total Supply	Max Supply	Circulating Supply
270,000,000	270,000,000	243,000,000
DEX Fee	CEX Fee	Transfer Fee
4%	0%	0%

A 4% fee is deducted on each transaction and these tokens are burned to continuously increase the token value. This only applies when trading on Decentralized Exchanges (DEX).

There's no additional fee for transferring tokens or trading on Centralized Exchanges (CEX).

Network

BNB Chain

avalanche

Smart Contract is available on the official website
metagoldverse.com

HOW TOKENOMICS WILL BOOST THE WORLD

MetaGold (\$MGV) will become a self-sustaining economy. Traditional businesses will establish locations for themselves in MetaGold Verse, where they will be able to sell and promote their digital and real-world goods and services.

We will enable the creation of new business models and a new breed of digital entrepreneurs, removing the barriers for them to provide innovative goods and services to the global MetaGold community. \$MGV will be used to buy and sell goods, from traders and creators.

MetaGold World will be the place where people will come to work, learn, rest, shop, and play.

MetaGold (\$MGV) Tokenomics have been designed to encourage new users to explore and experience the world, whilst motivating more seasoned users to build, complete quests and further develop our new world together. These incentives will drive the rapid adoption and growth of MetaGold. It will keep users engaged and returning.

- ✓ More Users
- ✓ More Entrepreneurs
- ✓ More Businesses
- ✓ More Advertisers

This will be good for users but also entrepreneurs, businesses and advertisers, who want to be where their potential customers are.

As the sole currency of MetaGold Verse, users will receive \$MGV Tokens as a reward for time spent in MetaGold virtual reality and their activities such as:

- Fulfilling Quests
- Creating Anything
- Extracting Resources
- Their Activity

Users will be able to acquire items that will help them earn VR tokens faster. At the start of the game, only basic items will be available to the user with resources having to be extracted manually.

Users will be able to use their \$MGV Tokens to purchase a shovel, enabling them to extract resources faster. Eventually, the user will be able to purchase machinery such as a digger or miner to extract the resources automatically, even when they are not playing in-game.

The entire MetaGold Economy is mathematically designed to be very interesting for everybody while motivating the experienced users to create and the newcomers to play, explore and discover. As a result, the world of MetaGold will continue to grow rapidly, which in turn will be good for all the current users and the entire community. At the same time, everything is mathematically designed so that the wealth/fuel of MetaGold never runs out and the rewards and motivation for players and creators never ends! In MetaGold World, the main currency is the \$MGV Token.

There are also MGV Lands where you can build something new, resources (5 elements) that are needed for construction (each object used to build requires certain resources) and items that you can buy, find, win or create yourself! At the same time, there are XPs (experiences gained by completing Quests), which the players need to complete other Quests. Users who do not care about Quests are free to enjoy the beauties of the MetaGold Open World for discoveries, shopping or entertainment, such as user-built projects, NFT markets, games, competitions, lectures, presentations, showrooms, museums, streams, schools, courses, concerts and other social events.

Acquiring MGV Tokens

- Buying (MGV Token Sale or on an exchange).
- Trading Items in the MetaGold Marketplace.
- Staking their tokens.
- Mining (Gameplay).
- Completing Quests.
- Exploring the World.
- REAL Airdrops.
- Competitions.

Using MGV Tokens

- Staking
- DAO
- Buying virtual Lands
- Buying all assets (items, buildings, resources, wearables, services, tickets, courses, art)
- Buying modificatory that generate your passive income
- Advertisements
- Transport
- Leasing
- And other Extras

WHAT MAKES US BETTER

Unrivaled Graphics

- The ultimate virtual reality experience with realistic graphics rendered with the latest Unreal Engine.
- A unique dynamic special effects solution.

Tokenomics – PLAY TO EARN (\$MGV)

- A never-ending motivating economy that rewards active users and stakers.

The Quests System

- Motivating users to return to MetaGold Verse.
- Fully algorithmical, so MetaGold will continue to live on without the original creators.

New Combat System

- Revolutionary combat system set to become the industry standard for virtual reality.

NFT Revolution

- Users can Create, Modify and Combine NFT's.
- Creators can showcase and sell digital artwork in the NFT Gallery.
- NFT's can be securely traded in MetaGold Marketplace.

Future Proofed

- The MetaGold World server solution is fully upgradable and scalable.
- The DAO gives control of the future evolution of MetaGold to the people who create and play in this virtual space, it is the users who will be in control of the policies that determine how the world behaves.

Largest Number Of Use-Cases

- Appeals to a wide audience of business and leisure users.
- Commercial Partnerships, Entertainment, New Business Models.

- ✓ NFT's
- ✓ Cryptocurrency
- ✓ Blockchain
- ✓ Fully Immersive Virtual Reality
- ✓ Realistic Graphics
- ✓ Hyper Realistic SFX
- ✓ MMORPG
- ✓ Build anything, anywhere
- ✓ Quests to earn rewards / in-game currency
- ✓ Rewards as you create
- ✓ Avatar Development
- ✓ Business/ Enterprise Creation
- ✓ Decentralized Currency Market
- ✓ Decentralized Autonomous Organisation
- ✓ Algorithmization

VISION

Our Vision for MetaGold is to create a virtual world that is both engaging and practical. Providing real solutions to many of the challenges we face both individually and collectively as an interconnected global society. A place where people come to work, rest, shop, play and learn.

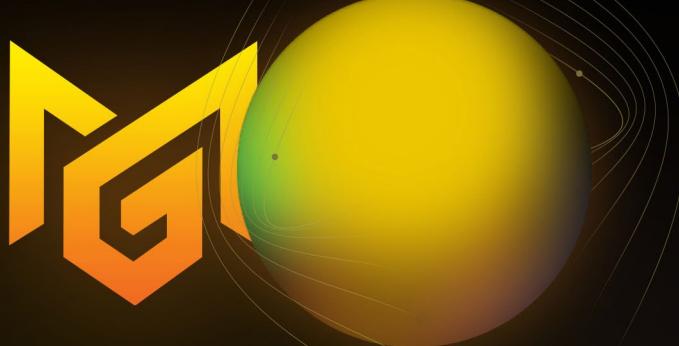

We will create and nurture a self-sustaining economy of both established and new innovative businesses, with the world future-proofed, and continuing to evolve over time without dependence on its original creators.

A world rich with content, activities and opportunity. Where businesses choose to invest, and citizens choose to spend their time and money.

WE LOOK FORWARD TO WELCOMING YOU TO THE WORLD OF THE FUTURE

Our vision is to allow our users to bring to life their craziest ideas and their most secret wishes. We want our citizens to be able to experience their greatest life desires, with unlimited possibilities for working, creating, discovering, and trading.

We want our citizens to enjoy every moment they spend within MetaGold, to share their experiences with their networks and community, and to keep coming back.

BIG MARKETPLACE

Accessible both in-world and from a mobile app, MetaGold will take the trading of NFT's to the next level with MetaGold Big Marketplace - creating an NFT paradise for creators, collectors and traders.

A decentralized marketplace operating on smart contracts, The MetaGold Big Marketplace will be the largest blockchain NFT asset exchange.

Users will be able to trade literally anything and everything even new items which can be directly created in The MetaGold Big Marketplace and which have never been offered before.

Facilitating the trade of goods and services, users can create and join auctions, with items available to be tested and inspected in detail before purchase.

P2P Trade Plugin

When meeting people in MetaGold world anything can be traded or offered to other users by shaking hands to close the deal.

NFT's: Non-Fungible Tokens

Non-fungible describes an asset that is unique. NFT's contain identifying information recorded in their smart contracts. It's this information that makes each NFT different and as such, they cannot be directly replaced by another token.

They cannot be swapped like for like, as no two are alike. We use several standards of NFT's, for example:

ERC721: Each NFT's is one unique item in MetaGold World. This standard allows us to tokenize ownership of any arbitrary data.

ERC1155: Standard used to create both fungible (currencies) and non-fungible assets (e.g. in-game items). Transactions could be bundled together – thus reducing the cost of transferring tokens.

NFT REVOLUTION

NFT's in MetaGold World are revolutionary. We will be taking NFT's and their trading to the next level, with the ability to visualize 2D or 3D NFT's in a 3D space before purchasing.

Users are able to easily create their own NFT's and will be able to collect NFT's that have a functional use beyond decorative. These are NFT's that can give the user real superpowers such as flying or invisibility, or they can produce \$MGV Tokens or even more NFT's.

RESOURCES AND ELEMENTS

Resources are needed for the construction of Buildings and for the creation of Objects (other NFT's). The Resources are unlimited and unmined BEP-1155 NFT's on the side chain.

The 5 basic elements provide you with all the resources you need to build your world and everything in it:

1. Wood
2. Energy
3. Sand
4. Iron
5. Water

Resources can be mined manually or automatically – with special buildings, mines, items intended for mining.

Resources can also be bought in the Marketplace from other users (MetaGold Marketplace) or in case of shortage directly from the central warehouse.

Model Situation: A user comes and wants to build a Shop/Store on his MetaGold Land so they can showcase their goods and services. They do not have the time to mine the resources they need. So they will be able to purchase resources from other players at competitive market rates.

AVATARS

Created using Unreal's Metahumans, Avatars are fully customizable (over 1,000,000 possible combinations), in realistic graphics.

This allows users to create virtually anyone with each avatar written as an NFT's on the blockchain.

Users will not be restricted to a single Avatar, and can have several characters. Special custom features (horns, wings, etc.) can be obtained by completing Quests or from the competition.

Some features can supply your avatar with special abilities (flying, immortality, etc.).

WEARABLES

All wearables are listed on the blockchain as NFT's tokens. These can be obtained in Quests, Competitions, or bought at The MetaGold Big Marketplace. Users can dress up their avatar according to the latest trends, in historical robes or mystical clothes.

Some wearables are very limited, others give avatars special abilities (faster running, invisibility, etc.).

ITEMS

All items are NFT's written on the blockchain. They can serve as decorations or can be used directly, such as mining tools, keys to open various locks, as treasure maps, weapons, cars, flying boards, or Aladdin's magic carpet. Some items give users special abilities.

LANDS

MetaGold Lands are registered on the blockchain as NFT's. There is a limited amount of pre-defined land which can be purchased either through an auction or from another player. MetaGold Lands Auctions are planned for the Q4 2022. The owners of the MetaGold Land have absolute power over their MetaGold Land and what they choose to do with it. Whilst each MetaGold Land has a fixed maximum building height. Directly adjacent MetaGold Lands can be combined into one and permitting you to increase the maximum height of your building.

MetaGold Lands can be used:

For the construction of:

- Utility buildings directly in the game (mines, warehouses, etc.).
- Buildings for presentation (shops/stores, showrooms, etc.).
- Private buildings (clubhouses, private enterprises, etc.).
- As a port to another world, game or virtual reality.

They can be obtained very rarely.

- Token Sale.
- Quests.
- Competitions.
- Real Airdrops.

BADGES

- NFT's.

- Owners of badges will be able to regularly receive rewards.
- Owners can wear them.

P2P TRADE PLUGIN

- In the world, anything can be traded or offered to other users when meeting them in person. The deal can be opened by shaking hands.

QUESTS

Quests are one of the most important parts of the MetaGold, keeping the user engaged, rewarded, coming back again and again.

Completing Quests is productive and fun for users, offering completely different and revolutionary possibilities of interaction and transmission of information.

Completing quests will enable users to earn MetaGold Tokens and gain various very rare rewards (in effect, they mine the rewards of the MetaGold). This will encourage citizens to keep returning so that they don't miss out on a number of opportunities. For example, Quests may only be available for a limited period of time, need to be completed within a specified amount of time, or limited to the total amount of quest rewards available.

Quests will be used to educate citizens and to help them discover the many new possibilities and opportunities enabled through MetaGold and Virtual Reality in general.

Our Revolutionary Algorithmic Quest Creation means citizens will earn rewards by exploring new places in the virtual world (both places built by us and directly by the users) or discovering new technologies or opportunities in the real world or other parallel worlds where companies or crypto projects will be able to present their project or events.

Prepared Quest: Quests that showcase the beauty of the World of MetaGold. These quests are designed to encourage citizens to discover the possibilities and opportunities available to them in MetaGold.

Edu Quest: Quests that have been designed to entertainingly educate users about a range of subjects. This will primarily be around cryptocurrencies, blockchain, De-Fi and related subjects. With complete 3D immersion and visualization, information will be transmitted and experienced at a completely different level. This new Visualization of information will allow us to beautifully illustrate how blockchain, side chain, mining, staking, smart contract, swap, pool, yield farming, flash loans, NFT's and other technologies work. We want to educate our community of citizens how to handle, use and wisely invest for maximum returns. Here we give our partners the opportunity to present their projects in a beneficial way.

Epic Quest: Story Quests, once a month and always available only for one random day – the rewards are Epic Items (NFT's), Badges and MetaGold.

Algorithmic Quest/Algorithmically Generated Quest: These are Quests that can be created by anyone. Creating a Quest on their MetaGold Land will guide users to newly created locations so that the creators can introduce themselves, and advertise their goods and services.

Legendary Quest: Story Quests are designed for the most ambitious adventurers, Treasure and Easter Egg hunters, who will have to complete very challenging tasks to get to the most precious treasure. The number of Winners is limited in advance – the rewards are Legendary Items (NFT's), Badges and MetaGold Tokens.

Rare Quest: These are Story Quests that will be featured for one week. The rewards will be Rare Items (NFT's) and MetaGold Tokens.

MetaGold Team

We love what we do, and on top of that, we have an amazing team to do it with. The phenomenal individuals who make up our team are some of the best minds we know. We believe in our team, and we're proud of both the talents and credentials that come with the members!
